DZone’s Exclusive MVB Program

Join the world’s best technology writers and reach millions of new readers at DZone.com. Our Most Valuable Blogger program is designed to give writers a platform for reaching a global audience of software professionals. If you’re a tech expert who shares knowledge and insights, you’re a candidate for MVB status.

Why Become an MVB?

- Reach an engaged audience of developers and software professionals.
- Connect with other talented developers, software professionals, and tech writers.
- Get first access to paid opportunities to have your work included in official DZone publications like Guides and Refcards.

What Are the Requirements?

- Submit original content to DZone at least once a month.
- Be a positive force in and around the DZone community. Trolls will be shown the door.
- Don’t plagiarize. Seriously. If you’ve found it on the Internet, we will too.
- Be fluent in English. We don’t have the bandwidth to moderate in other languages yet, unfortunately.
- Know your stuff! MVBs are our community thought leaders. You don’t have to be a 10x dev, but you do need to “get” writing for a developer audience.
Frequently Asked Questions

What are the benefits of joining the MVB program?
MVBs gain recognition for being leaders in their fields, and benefit from increased promotion by DZone through social media and email marketing. Our editorial team also reaches out to MVBs with paid opportunities to author Refcards, Guide articles, and other content.

Didn’t this used to be a syndication program?
You’re right! New MVBs used to be automatically signed up for curated blog syndication, but we don’t do that anymore. We’re trying to encourage more original content on DZone because we believe that original content builds a stronger, more engaged community. You can still email us and ask that we consider your blog for syndication, but we’re a lot more selective about that than we used to be.

What can I write about?
Anything software-related or tech-related is fair game, although you’ll need to write from a developer perspective. Like all contributors, you will also need to adhere to our submission guidelines — for example, we don’t accept promotional content.

Who contributes to DZone?
Anyone with something to share about software and tech can be a contributor to DZone! Many of our contributors are actively involved in the creation of software and have been for a number of years. Others are architects, dev team leads, and executives. Still others are tech industry generalists.

How much does it cost to be published on DZone?
Nothing! DZone is completely free for all members and contributors, including MVBs.
