Enterprise Application Integration

As with most 2022 trends in the development world, discussions around integration focus on the same topic: speed. In DZone’s Enterprise Application Integration Trend Report, we will explore the common integration patterns and anti-patterns, the impact on overall operational efficiency, and the common practices that help an enterprise scale.

We will also dive into the exploration of integration distributed applications, how query languages like GraphQL help speed up APIs, when to use cloud-based integration platforms versus on-premise models, and more.

Expert Insights

The Enterprise Application Integration Trend Report will dive into the common integration practices that help an enterprise scale. Topics explored may include:

• GraphQL tutorial/use case
• “API-first” strategies
• The importance of EIPaaS
• Simplifying application integration complexity to enable new integrations or automation of existing ones
• Event-driven architecture as a strategy
• A deep dive into open API standards
• API security and governance
• Developing multiple integrations while also supporting multiple personas
• Adaptive API management

Developer Survey

The research component of this Trend Report will explore topics including, but not limited to:

• Most common integration patterns
• Where is automation used in the integration layer? For what purposes?
• Prevalence of SOAP, REST, gRPC, and GraphQL paradigms in developer attitudes toward APIs
• Preferred attributes of data interchange formats
• Rigidity of message schema enforcement
• Preferred degree of coupling between message wrappers and message format
• Interaction of API patterns and language-level constraints
• Common integration pain points
• Integration topologies in theory and practice
• Attitudes toward integration activities

How Trend Reports Reach DZone Readers

Each Trend Report is promoted to DZone readers across DZone.com, newsletters, and social media:

- Inclusion in 5-7 Daily Digest newsletters
- Inclusion in 1 Weekly newsletter
- 2-4 Dedicated emails
- Prominent and relevant onsite promotional placements and front-page features
- Promotions across DZone social channels

Previous Sponsors Included:

- Postman
- MuleSoft
- Broadcom
- Cloud Elements
- WSO2
- Red Hat
